UMI SURFACES

GRANITE
 This is a durable, stylish, natural stone that can be used in countertops, paving and wall coverings. The properties of granite make it the ideal stone surface. Its hardness and the inherent resistance to acid, make it an ideal natural stone for kitchen tops and high traffic areas.

QUARTZITE
 Quartzite is an extremely strong and durable natural stone. Its crystals are tightly fused forming a hard, crystalline rock that provides a stunning look that sparkles. Quartzite has an extremely hard scratch-resistant surface and is an excellent material for kitchens, bathroom vanities, fireplace surrounds, bar tops and other areas.

MARBLE
 One of a kind marble, exudes elegance and is a classic beauty. The color range features many light, creamy colors in beiges and white; however, there are deep browns, gold, blacks, reds and greens. When properly sealed marble can be used in all areas of your home and look absolutely stunning.

DOLOMITE
 is considered by many in the countertop industry to be a more durable cousin to marble, it is a good option for countertops. Dolomites are slightly harder than your average marble but are much softer than granite.

FORUM QUARTZ
 Forum Quartz is recognized for its beauty, quality, and effortless care. Made using natural quartz, this material is extremely durable and comes in various colors. It is bound with resin inorganic pigments and manufactured with the most advanced machinery, Breton Technology.

SOLD OUTSIDE OF FLORIDA

POMPEII QUARTZ
 Made using 93% natural quartz which makes this material extremely durable and comes in a variety of colors. Pompeii Quartz is a natural surface material made from pure and natural quartz. Manufactured with the most advanced machinery, Breton Technology.

SOLD IN FLORIDA.

INFINITY PORCELAIN
 Porcelain slabs by Infinity mimic the beauty of the natural stone. Infinity porcelain slabs are offered in a range of thicknesses from 6mm, 1.2cm, and 2cm. These durable porcelain slabs are resistant to wear, including scratches and abrasions; high heat, UV rays, chemicals, and stains.

VETRAZZO
 This unique material is an environmentally friendly material comprised of large shards and finely ground recycled glass. It is bound with cement or resin; making it extremely durable and easy to maintain and is an excellent alternative to granite.
