

Thin, sleek, and reinforced.

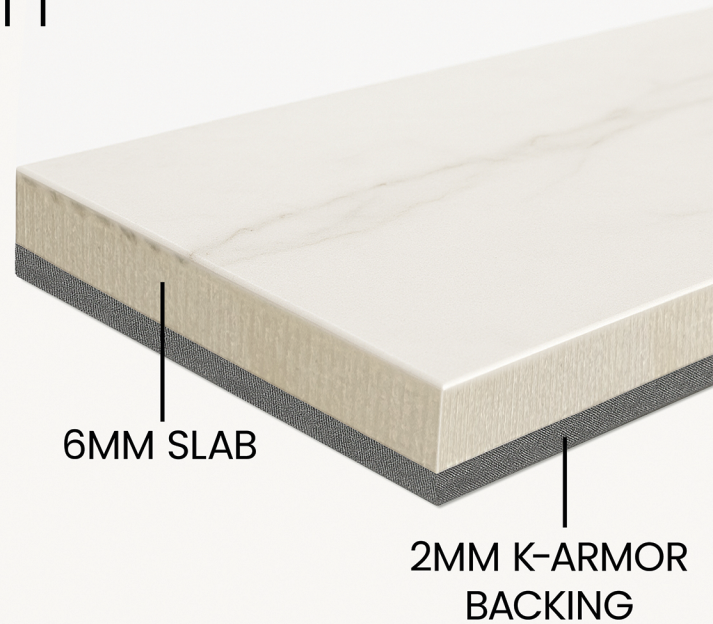

# Infinity Porcelain with K-Armor Backing

## Exclusive to UMI

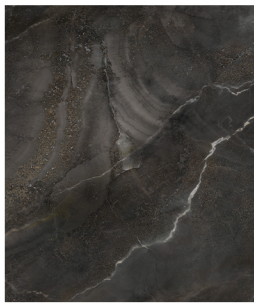

Infinity porcelain slabs with K-Armor backing combine refined design with unmatched durability. This innovative system bonds a **6mm porcelain surface** to a **2mm reinforced backing**, delivering superior strength and versatility across residential and commercial applications.

## Key Advantages

- 12mm rigidity at an 8mm price — premium strength without the added cost.
- Confidence in fabrication — cuts and fabricates with ease, using the same cutting speeds as standard 12mm porcelain.
- Enhanced impact resistance — built to withstand daily wear and long-term use.
- Improved dimensional stability — ideal for large-format installations with clean, precise edges (rectified slabs).
- Easier handling and installation — lighter weight for streamlined transport and setup.
- Versatile applications — perfect for fireplaces, vertical wall cladding, shower surrounds, floors, and indoors or outdoors.
- 21 stocked designs — available exclusively through UMI.
- Competitive pricing and score-and-snap capability — cost-effective solution for quick fabrication and installation.
